NATIONAL BIOMEDICAL ENGINEERING HONOR SOCIETY

On my honor, I [state your name] solemnly promise that:

I will always give my utmost and take deep pride in my profession and all that I do.

I will practice engineering with integrity, humility, honesty, and compassion.

I recognize that the practice of engineering is a privilege that comes with considerable responsibility and I will not abuse my position, skills or intellect.

I will respect the hard-won scientific gains of those in whose steps I walk, and gladly share such knowledge as is mine with those who are to follow.

I will give to my teachers, parents and school, the respect and gratitude which are their due.

I will recognize the limits of my knowledge and seek to maintain and increase my understanding and skills throughout my professional life.

I will be respectful of nature, and its vast resources and will be a good steward of the earth, avoiding waste and making good use of its resources.

I will use my talents and knowledge without reservation for the public good.

I will always stand for what is morally right.

I make this declaration solemnly, freely, and upon my honor, without any reservations or purpose of evasion; and that I will well and faithfully serve the profession and the field of biomedical engineering, upon which I am about to enter.
